

HOME EV CHARGER

7kW - 11kW - 22kW

High-Performance

Engineered to meet stringent EU standards, our 7-22 kW AC charger offer versatile configurations to suit diverse needs. Built for continuous high-power output, they integrate seamlessly into the Tuya ecosystems

AI Scheduling & Smart Timers

Stay ahead of energy costs. Compatible with over 890 dynamic tariffs, the built-in AI Mode automatically schedules charging during the valley hours. Users can also easily preset custom schedules and timed tasks for effortless, automated, and intelligent energy management

ON/OFF Remote Control

Users can remotely turn the device on or off through mobile apps or remote controls without being physically present

Dynamic Balancing

The system automatically adjusts parameters in real-time to maintain optimal device balance and efficiency under varying conditions
